

## Introduction

Inventory management is the process of overseeing and controlling the stock of goods and materials used by a business. It involves keeping track of the quantity of items in stock. Effective inventory management can help a business improve efficiency, reduce costs, and increase profits. This website helps to keep track of the available stock. And it will alert you when the quantity has reached a certain level so that you can place the order for new stock before the stock runs out. You will not have to worry about forgetting to order anymore!!
